- MySQL
- Polymer
- REST APIs
- Sencha ExtJS
- Spring
- JasperReports
- Scrum/Agile
- Mockito
- Hibernate/JPA
- PHP

Soft Skills

- Mentor
- Collaborator
- Coordinator
- Outgoing

Languages

- French
- English
- Spanish (*learning*)

Education

Champlain Regional
DEC of Information Technology
2010 - 2012

Motivated to learn. Motivated to work. Motivated to teach.

I love finding solutions to problems, both old and new, either with a team or on my own. I have experience in both project and maintenance methods of development, as either a member or a leader.

I have mentored many new developers successfully and have always received positive feedback from both mentees and managers.

Work Experience

Université de Sherbrooke | Full stack Java developer

Oct 2016 - Present | Sherbrooke, Quebec, Canada

Developed enterprise applications using Spring, Sencha ExtJS, MyBatis, Hibernate, Mockito and Karma.

- Worked with a team of over 20 developers, analysts and QA in agile to build and design a template for a multitude of applications, ensuring high reusability and a significant reduction in development time.
- Trained and mentored 10 new employees over the span of 3 years; designing training plans, building a sample application and creating documentation for trainees.
- Continuously worked with team members to increase the efficiency of our work methods, creating new work methods and designing specification documents.

CGI Sherbrooke | Full stack Java developer; Consultant

Mar 2014 - Sep 2016 | Sherbrooke, Quebec, Canada

- Lead a team of 3 interns to produce an end product.
- Met with clients to make sure they understand and are up to date on their various needs.
- Planned and executed projects, assigning tasks to the appropriate teams.
- Migrated and updated an entire legacy system to modern standards.
- Wrote documentation for both clients and developers, including detailed manuals over 100 pages long.

OmniMed | Legacy software / maintenance developer

Jul 2012 - Mar 2014 | Cookshire-Eaton, Quebec, Canada

Data format conversion and legacy code maintenance.
